Here is an affiliate downline example:

First Example

Using the diagram above, if Michelle Richard refers a customer/buys a package, she would get the Level 1 commission of 15%. The upline would get the rest, like so:

- Michelle Richard = 15%
- Rafael Bertha = 10%
- Claudette Lili = 5%
- Bill Toshie = 5%
- Debbie Marie = 3%

The direct referring affiliate will always get the Level 1 commission amount, his sponsor, level 2, his sponsor's sponsor, level 3 and so on (number of levels depends on position chosen).

Another Example

If Rie Helen refers a customer, she will get Level 1 and her sponsor Debby Maria, would get Level 2. If Debby Maria does not have a sponsor, then no Level 3 and no Level 4 commission will get generated.

Third Example

If Claudette Lili refers a customer, she gets Level 1 commission, Bill Toshie gets Level 2, and Debby Maria Level 3. If Debby Maria does not have a sponsor, then there won't be a Level 4 commission generated.

Note: No limit on downline 'width'.
